

Crawl popular websites & create a database of Indian movie celebrities with their images and personality traits.

Pre-requisites:

Install scrapy:

Installation guide: <https://docs.scrapy.org/en/0.14/intro/install.html>

To start scraping:

```
cd intership
```

Open terminal and enter the following command to scrap the given website:

```
scrapy crawl celebrity
```

To store the obtained information as csv or xml or json file:

```
scrapy crawl celebrity -o [name of the output file].[extension to be saved in]
```

For example, to save the data in csv file:

```
scrapy crawl celebrity -o celebrity.csv
```
